DETAILED ACTION

1. This is the third office action for application No. 10/019,770. This application contains 4 claims numbered 1-4.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 3/29/04 has been entered.
3. The information disclosure statement (IDS) submitted on 3/29/04 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "a corresponding opening" line 12 which is unclear as to what opening that a corresponding opening is corresponded to since there are two openings: a feed opening and a drain opening recited in claim 1.

Claim 3 recites the limitation " the outlet opening of the drain pipe socket" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 3, the linking term "preferably" is considered indefinite since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent no. 4,919,274 to Hammond.

Hammond teaches an handling apparatus for a reverse vending machine for bottle and cans comprising a cover (14 generally) having a feed opening (26) and a drain opening (116) is adjacent the feed opening (26) and a corresponding opening (20, Fig. 2) positioned within the handling apparatus of the reverse vending machine. Hammond's reverse vending machine can be operable with the cover removed

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,361,913 to Melchionna.

Melchionna teaches an handling apparatus for a reverse vending machine for bottle and cans comprising a cover (front 16 generally) having a feed opening (19) and a drain opening (42, 44, 45, 99) is adjacent the feed opening (26) and a corresponding opening (the opening inside of the handling machine to collect the cans/bottles or rejected cans/bottles) positioned within the handling apparatus of the reverse vending machine. Melchionna's reverse vending machine can be operable with the cover removed.

Allowable Subject Matter

6. Claims 2-4 are rejected but would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new grounds of rejection. The allowable subject matter indicated in the office action mailed 12/29/03 is withdrawn.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6,186,308 to Coyne et al.

5,161,661 to Hammond.

The above patents disclose various types of Reverse vending apparatuses.
